## MACKENZIE STAFF AWARDED ASSOCIATE RECOGNITION

**Portland, Oregon (January 4<sup>th</sup>, 2016)** – Mackenzie Managing Principal Rich Mitchell announces multiple staff recognitions for their contribution to the firm’s success. “These key staff members have proven to be driven, inspiring individuals who are highly-deserving of their recognition as Associates.”

Lorraine Jack has earned a well-deserved recognition as Associate at Mackenzie. “I am honored to receive this recognition from the Mackenzie family,” said Lorraine, “My coworkers have guided, supported, and inspired me to be ‘all in’ and deserve a lot of the credit for my career growth over the past five years.” During her undergraduate studies at the University of Oregon, Lorraine carried out an internship at Mackenzie. Upon completion of her Bachelor of Architecture degree, she returned to Mackenzie and was hired as a full-time employee in 2010 to join the retail team, working on the design of Fred Meyer stores. Lorraine has implemented her extensive architectural experience and strong Revit proficiency on some of Mackenzie’s most noteworthy projects, including the Intel Ronler Acres MSB1, The Hudson in Vancouver, Washington, Stadium Fred Meyer, and the Albany Fire Station. Lorraine has been a member and volunteer project leader for Architects Without Borders, the ACE Mentor Program, and is currently a volunteer designer for NCompass International.

Adam Olsen is being recognized as an Associate after outstanding performance since joining the firm in 2013. As a Registered Architect, Olsen has nearly two decades of experience in architectural design and project management. He currently plays an essential role on Mackenzie’s industrial team, assisting in the design process for several large projects, including the Gateway Corporate Center, Southwest Industrial Park, Cameron Distribution Center, and Goodwill Boutique. “What I enjoy most about working at Mackenzie is being able to collaborate with all the different in-house disciplines,” Olsen says. Olsen holds a Bachelor of Architecture degree from the University of Oregon, and he is certified as a LEED Accredited Professional and Green Globes Professional.

Kara Grothen is recognized as an Associate for her success as a job captain in Mackenzie’s Architecture Department. Grothen initially joined Mackenzie in 2006 after earning her Bachelor of Architecture degree from the University of Oregon. She has taken on many managerial roles on several of Mackenzie’s projects, including the Evergreen Wings and Waves Waterpark, Intel Ronler Acres MSB1, and MachineWorks – a mixed-use, urban infill development. Grothen is excited about her recent corporate recognition, claiming, “Mackenzie has given me the opportunity to work on a wide range of interesting and unique projects, and I look forward to further my career development at the firm!”
