**MACKENZIE RECOGNIZES ARCHITECT RYAN WESTON AS A SENIOR ASSOCIATE**

**Vancouver, Washington** – Managing Principal Rich Mitchell is pleased to announce the recognition of Ryan Weston as a senior associate. “She’s been a pivotal part of our industrial team for many years—managing projects and assisting in the design of some of Mackenzie’s, and the region’s, most valued production and distribution facilities,” Mitchell said. “This recognition is well-deserved, and we congratulate her on this momentous achievement.”

Weston, a registered architect in Oregon and Washington, is a job captain on Mackenzie’s industrial team. In addition to designing the Portside Development in Vancouver and the Washington Department of Fish and Wildlife at the Port of Ridgefield, she is a project manager on Capstone’s large-scale industrial project that has brought thousands of jobs to the Portland region: the PDX Logistics Center. “I am honored at the incredible opportunity of becoming a senior associate at Mackenzie,” said Weston, “a goal that I have desired and worked towards since joining the firm out of college. In no way could I

have accomplished everything that I have in the last 11 years without the amazing support and guidance of the Mackenzie family, and for that I thank them.” She carries a Bachelor of Architecture degree from Washington State University, and is a certified Green Globes Professional (GGP), a sustainability certification program from the Green Building Initiative.

**About Mackenzie**

Mackenzie is a provider of professional design services comprised of professionals in architecture and interior design; structural, civil and traffic engineering; land use and transportation planning; and landscape architecture. Anchored in the foundational elements of high performance and client focus, Mackenzie brings a deep expertise in commercial office, healthcare, community infrastructure, education, institutional, federal, high tech, public building, industrial, retail, community planning, economic development, and mixed-use projects.
