MACKENZIE RECOGNIZES NEW SENIOR ASSOCIATES AT PORTLAND OFFICE

Portland, Oregon – Rich Mitchell, Managing Principal at Mackenzie, announces the recognition of Cathy Bowman and Adam Olsen as senior associates. “These talented architects have not only greatly impacted Mackenzie’s projects from a design and technical standpoint, but also by influencing other aspiring interns within the firm,” Mitchell said. “We have witnessed their passion and dedication, and appreciate them for being valued resources for Mackenzie and our clients.”

Bowman is currently a project architect on Mackenzie’s public design team, with experience in the design of fire and police facilities, including the Beaverton Public Safety Center, Depoe Bay Fire Station 2300, and Vancouver Fire Stations 1 and 2. Her project portfolio is expansive and includes several other project types, including educational, institutional, retail, and commercial. “I am honored to be recognized among such a talented group of people, who have truly helped me grow professionally,” Bowman said.

“Mackenzie has an amazing team of people to work with and I look forward to the next part of my journey with them.” Bowman carries a Bachelor of Architecture degree from the University of Kentucky. She is a registered architect in Oregon and Kentucky, and is a member of the American Institute of Architects (AIA) and the US Green Building Council (USGBC). Bowman also carries professional LEED credentials for building design and construction, and is a certified Green Globes Professional (GGP)—a certification from the Green Building Initiative.

Olsen is an architect on Mackenzie’s public design team, and has nearly two decades of industry experience. While he currently manages public projects, Olsen has impacted and created value across the firm on several project types, including Mackenzie’s retail and industrial projects. “I am tremendously humbled and honored to become a senior associate at Mackenzie,” Olsen said. “I’m excited for the future and growing alongside my fellow coworkers and designers, of whom I could not thank enough for the guidance they’ve given me throughout my career.” Olsen strongly emphasizes the value and

demand for sustainable design, carrying both LEED credentials and the Green Globes Professional (GGP) certification. Olsen received his Bachelor of Architecture degree from the University of Oregon.

About Mackenzie

Mackenzie is a provider of professional design services comprised of professionals in architecture and interior design; structural, civil and traffic engineering; land use and transportation planning; and landscape architecture. Anchored in the foundational elements of high performance and client focus, Mackenzie brings a deep expertise in commercial office, healthcare, community infrastructure, education, institutional, federal, high tech, public building, industrial, retail, community planning, economic development, and mixed-use projects.
