## MACKENZIE WELCOMES PRINCIPAL OF ARCHITECTURE STEVE HARMON

**Seattle, Washington** – Managing Principal Rich Mitchell announces the addition of architect and Principal of Architecture Steve Harmon to Mackenzie's Seattle office. As the previous vice president of Callison/RTKL's commercial and residential business sector, Harmon was responsible for implementing the firm's market and project delivery strategies. His addition to Mackenzie's Seattle office will bolster the firm's commercial/mixed-use development team in Seattle, as well as serve in an advisory role for the office's Architecture Department. "I've known and had a professional work relationship with Steve that spans well over three decades, and his experience in leading high-performance design and providing the best solutions will be highly beneficial, particularly to our Seattle-area clients," said Mitchell. "Our people are our greatest asset, and I believe Steve's depth of experience and leadership qualities will also assist in the growth of our emerging professionals, firm-wide."

Harmon is a respected architect in the Pacific Northwest community, and brings 37 years of design and project management experience to Mackenzie's Architecture Department in Seattle. His architectural portfolio is impressive and varies in project types, including hospitality, mixed-use, residential and retail. Harmon's most recent projects include the mixed-use Fana Four 106 in Bellevue, downtown Seattle's Macy's Building renovation and reposition, and the Limelight Hotel in Idaho. He is a member of the Urban Land Institute (ULI) and American Institute of Architects (AIA), and carries LEED professional credentials in building design and construction (LEED AP BD+C). Harmon has a Master of Architecture degree from the University of Washington.

### About Mackenzie

Mackenzie is a provider of professional design services comprised of professionals in architecture and interior design; structural, civil and traffic engineering; land use and transportation planning; and landscape architecture. Anchored in the foundational elements of high performance and client focus, Mackenzie brings a deep expertise in commercial office, healthcare, community infrastructure, education, institutional, federal, high tech, public building, industrial, retail, community planning, economic development, and mixed-use projects.
