MACKENZIE RECOGNIZES NEW ASSOCIATES

Portland, Oregon – Managing Principal Rich Mitchell announces the recognition of Adrienne Clifford and Adria Kremer as associates. “Adria and Adrienne have both proven to be valuable members of our architectural department,” said Mitchell. “This recognition is highly deserved, and we look forward to their career growth and contributions at Mackenzie.”

Clifford has been on several design teams at Mackenzie since joining the firm in 2014 and carries a wide range of design expertise. Her expansive project portfolio includes One Main Place, Lake Oswego Civic Center, 30th and Killingsworth Apartments, and Safeway in Pacifica, California. Clifford’s skillset stems from her passion for building science and knowledge of building envelope systems, and lends her unique perspective through all phases of project design. “Mackenzie has provided so many wonderful opportunities for me over the past three and a half years, and I am so grateful to work with such a talented group of people daily,” said Clifford. “I am honored to receive this recognition and look

forward to focusing on public projects and integrating my design skills into Mackenzie’s future projects.” Clifford carries a Bachelor of Architecture from the University of Oregon and is a registered architect in Oregon.

Kremer has nearly a decade of architectural design experience and has been influential on a variety of design teams within Mackenzie, working on retail, mixed-use, and high-tech projects. She is a leader in implementing the latest design software firm-wide to streamline project delivery for clients. Her portfolio includes projects such as the Intel Ronler Acres MSB1 Facility, 24 Hour Fitness Gladstone, and 24 Hour Fitness Tacoma. “I’m truly honored to be recognized by Mackenzie,” said Kremer. “I’m very grateful for the time and wonderful support my mentors and coworkers have given me over the past 5 years, and I’m excited for the opportunity to continue to grow my skills and career.”

Kremer has a Bachelor of Science in architecture from Ball State University and holds LEED professional credentials.

About Mackenzie

Mackenzie is a provider of professional design services comprised of professionals in architecture and interior design; structural, civil and traffic engineering; land use and transportation planning; and landscape architecture. Anchored in the foundational elements of high performance and client focus, Mackenzie brings a deep expertise in commercial office, healthcare, community infrastructure, education, institutional, federal, high tech, public building, industrial, retail, community planning, and mixed-use projects.
